### **IT Systems Engineer - outside**

For 27 years U.S. Business Systems has been recognized as the leading provider of business technology solutions throughout North Central Indiana and Michigan's Great South West. U.S. Business Systems is expanding its M.N.S. division and is seeking to hire another IT Systems Engineer to ensure long-lasting customer relationships.

#### **Knowledge, skills and abilities of the successful candidate to include:**

- Ability to implement the client management and maintenance plans that include Windows and 3rd party software patching, Business applications, Workstation clean up, Active Directory management and all network documentation.
- Capable to perform top tier technical support and work to resolve complex IT and software issues that are escalated from the Help Desk engineers.
  
- **Additional Job Knowledge:**
- Windows Server and Workstation Operating Systems
- Active Directory design, management and maintenance
- Microsoft Exchange, SQL and SharePoint
- DNS, DHCP, Remote Desktop Services
- VMWare, Hyper-V and other virtualization technologies
- Storage solutions: SAN, NAS, Shared storage, iSCSI, Fiber Channel
- Firewalls, switches and other networking technologies
- Disaster Recovery solutions and backup technologies
- Office365, Azure and other "cloud" solutions
- Mobile operating systems (IOS, Android, Windows)
- RMM tools

#### **Education / Requirements:**

- Computer Related Degree or Industry Certification with 3+ years of related experience.
- Valid driver's license and clean driving record
- Must be able to do some light lifting
- Superior time management skills and the ability to perform under pressure.

#### **What employees get out of a career with USBUS:**

- Good compensation
- Medical, Life, Vision insurance available.
- 401k with company match.
- Paid time off.
